### Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

### Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: <http://cellular1.net/hac.asp>

Explain:

### Consumer Outreach

Describe consumer outreach efforts in the past 12 months: Cellular One of East Central Illinois' compliant handset models are publicly identified for consumers and audiologists. Compliant models are listed on the company's web site, and its retail salespeople are trained to assist with complaint digital wireless phones. Written materials, and promotional literature are provided at the point of sale and on the website, addressing the needs of individuals with hearing disabilities. Such consumers are given a 30-day trial period within which to try out digital wireless phones to determine whether they will work properly with their hearing aids.

### Methodology for Functionality Levels

Low-Tier Phones offer basic wireless telephone features, may not have a camera, Bluetooth, or Internet access capability, and generally lack such features as MP3 players and expandable memory. The designs are typically bar or flip for customers using voice or text only.

Mid-Tier Phones may have a camera, Bluetooth or Internet capability, but are less likely to offer video/music/media player capability. The designs are less stylish and tend to be clamshells or flips.

High-Tier Phones have more extensive features, such as Bluetooth, Internet access capabilities, increased storage or expandable memory, high-resolution color display, enhanced camera or video capabilities, and music or MP3 player functionality. The designs are more modern and sleek.

PDA & Smartphones typically have QWERTY or touch keypads and go beyond just making phone calls to including operating systems that allow the phone to run productivity applications and have software that may enable you to create and edit Microsoft Office documents or at least view them, download applications, edit photos, access the web, and more.

### Report Remarks

Cellular One of East Central Illinois does not operate network facilities utilizing the WCDMA air interface. Handsets capable of operating on a WCDMA air interface are not offered for the purpose of use on Cellular One's voice network.
